

I am very concerned about Sinclair Broadcasting's plan to air an anti-Kerry documentary right before the election, without offering a balanced point of view.

I thought that because the public airwaves are used free of charge by the broadcasters, that they are supposed to serve the public interest, not partisan ones. I am already worried about media consolidation and it's effect on the information available to most Americans. This is a glaring example of what I'm worried about. We need stronger media ownership rules, not weaker ones.

Please do not allow them to follow through on this partisan plan. Thank you.
